DETAILED ACTION

1. 35 U.S.C. 112, first paragraph, requires the specification to be written in "full, clear, concise, and exact terms." The specification is replete with terms, which are not clear, concise and exact. The specification should be revised carefully in order to comply with 35 U.S.C. 112, first paragraph. Examples of some unclear, inexact or verbose terms used in the specification are: from page 3 line 24 to page 4 line 2, the description of molar parts for formulae (II) and (III) are out of range of previously defined. The correct ranges for formulae II and III are 85-98 and 2-15 molar parts, respectively (see page 3, lines 8-9).

Claim Rejections - 35 USC § 112

2. Claims 2-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are vague and indefinite. In the present instance, claim 1 recites the broad recitation of formula II (85-98 molar parts) and formula III (2-15 molar parts). However, the claim 2 (formula II from 3 to about 10 molar parts), claim 3 (formula III from 90 to 97 molar parts) and claim 5 (combined claims 2 and 3), which are the narrower statement of the ranges. Claims 4 and 6-9 are rejected because they are dependent claims.

Art Unit: 1756

3. Claims 4-9 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n).

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-8 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 13-16 of copending Application No. 10/726,119. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed composition of the present invention is encompassed by the copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Art Unit: 1756

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior arts provided in IDS (3/26/04 and 6/24/04) and cited in PTO-892 fail to disclose a composition comprising specific components and their concentration ranges of liquid crystalline polymer having a melting point 400 °C or more.
